

1 19. The transceiver circuit of claim 2, characterised in that said control circuitry is configured
2 to detect a data end message as an indication of the end of transmission of said packet.

1 20. The transceiver circuit of claim 3, characterised in that said control circuitry is configured
2 to detect a data end message as an indication of the end of transmission of said packet.--

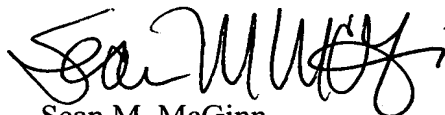

REMARKS

The above changes to the claims have been made, and new claims have been added,
to delete multiple-dependency.

No new matter has been added.

Please charge any deficiencies in fees and credit any overpayment of fees to Attorney's
Deposit Account No. 50-0481.

Respectfully submitted,
